

Ege Ayhan

Computer Science Student · Software Engineering Intern

egeayhan86@gmail.com github.com/Afillex afillex.github.io linkedin.com/in/ege-ayhan İzmir, Türkiye · Erasmus in Germany

SUMMARY

Second-year Computer Science student at İzmir Institute of Technology, currently on an Erasmus exchange in Germany. I build across the full stack — from React/Firebase web apps and PyTorch ML tooling to bare-metal C/C++ systems, including a custom audio-player OS for a real phone. Seeking a software-engineering internship where I can ship real code and learn from a strong team.

EDUCATION

B.Sc. Computer Science — İzmir Institute of Technology (IYTE) 2024 – 2028 (expected)
İzmir, Türkiye

Erasmus+ Exchange — Germany Exchange
Coursework incl. Algorithm Engineering; German language (B1.1)

SELECTED PROJECTS

EgePod — Bare-metal Digital Audio Player OS github.com/Afillex/EgePod
Custom OS for the Redmi Note 10S: three single-purpose C/C++ daemons (audio, power, UI) over Unix-socket IPC, a pure ALSA pipeline, and a 20–30 mA power budget. Ships with a simulator to run without the hardware.
[C](#) · [C++](#) · [ALSA](#) · [Linux kernel](#) · [POSIX IPC](#)

GraphMaker — AI-agent proof visualizer github.com/Afillex/GraphMaker
C++ state-machine engine driving a Node REST/WebSocket layer and a browser renderer (Cytoscape.js + KaTeX), letting LLM agents build step-by-step graph proofs.
[C++](#) · [Node.js](#) · [WebSocket](#) · [JavaScript](#)

CNN Explorer — interactive deep-learning tool github.com/Afillex/cnn-explorer
Design a convolutional network with sliders, train it live, and visualize feature maps and weight distributions — built with PyTorch and Streamlit.
[Python](#) · [PyTorch](#) · [Streamlit](#)

WG Wars — real-time multiplayer game github.com/Afillex/wg-wars
Multiplayer bluff/bidding party game with room-code lobbies and timed rounds, synced in real time with Firebase. React 19 + Vite.
[React](#) · [Vite](#) · [Firebase](#)

minimal-api — HTTP server in pure C github.com/Afillex/minimal-api
Dependency-free HTTP API built directly on POSIX sockets, with custom request parsing, routing, and per-endpoint handlers.
[C](#) · [POSIX sockets](#) · [HTTP](#)

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, Java

Web: React, Next.js, Node.js, Vite, Firebase, REST/WebSocket

AI / ML: PyTorch, Streamlit, NumPy, pandas

Systems & Tools: Linux, ALSA/embedded, Make/CMake, Git, raylib

LANGUAGES

Turkish — Native **English** — Fluent **German** — B1.1 (improving)
